PROFESSIONAL SUMMARY

I'm a passionate full-stack developer focused on building user-friendly, real-world web applications with clean design and smooth interactions.
I enjoy turning ideas into practical solutions using modern technologies and a strong problem-solving mindset.

PROJECT

Apna Xerox | NodeJs ,Express,Emailjs,Open Map,MongoDB
• Seamless Nearby Xerox Discovery: Connects users to nearby Xerox shops and enables online document upload and printing with no login required.
• Integrated Online Payments: Allows secure, cashless payments directly within the website for a smooth checkout experience.
• Real-Time Order Tracking: Provides instant email updates on order status from submission to completion

Invoizo | React, Nodejs, Express, MongoDB, Flowbite
• Quick Invoice Generation: Create professional invoices instantly through a simple, user-friendly interface without any login required
• Customizable & Downloadable Invoices: Easily add client details, items, taxes, and download invoices in a ready-to-share format.
• Fast & Hassle-Free Experience: Designed for speed and simplicity, enabling users to generate invoices efficiently with minimal effort.

Rakt Connect | Flutter, Express, MongoDB
• Simple Blood Request Creation: Users can easily create and manage blood donation requests with essential details like blood group, location, and urgency.
• Donor & Request Record Management: Allows adding, viewing, updating, and deleting donor and blood request data in an organized and structured way
• Clean & User-Friendly Interface: Designed with a simple and intuitive UI to make managing blood donation information easy and accessible for everyone

EDUCATION

Bachelor of Engineering in Information Technology; CGPA: 7.9/10.0
